Thinscape

Made from composite materials to achieve an overall thickness of 1/2", Thinscape is available as an upgrade option. Highly durable and versatile, Thinscape's slim 1/2" construction offers impact-, scratch- and moisture-resistance that performs well beyond what comparable products can achieve. We can manufacture custom sizes and shapes for any application. Please call 404.363.1665 or email orders@claytonfixture.com for costs and lead times.

Engineered in layers to be exceptionally dense. The 1/2-inch construction also features non-porous, impact, scratch, and moisture resistance that offers next-level durability and performance.

Proven, elegant designs. Zero substrate. Simple to care for, clean, and use everyday. Thinscape provides the ultimate solution for single-family & multi-family builds, commercial, hospitality, retail and office furniture applications. The exceptionally modern, European inspired designs are both trending and practical.

Designed for interior applications only and not recommended for exterior applications. However, as no one material is suitable for all possible conditions, Thinscape slab properties should be checked for suitability under the specific conditions of each application.
